SECTION 1.0 SHADOW BILLING

Shadow billing is a methodology that will ultimately provide all market participants with visibility during the transition period from billing using non-standard to standardized coding.

Following the implementation of the nphies system, Shadow Billing will allow Healthcare Providers (HCPs) to continue to communicate with Health Insurance Companies (HICs) and Third-Party Administrators (TPAs) using both the nphies standard codes and their previously contracted non standardized codes to maintain the same level of information exchange and reduce the impact on claim payment that may come from errors in mapping.

This methodology laid out in this guideline will also allow Health Insurance Companies (HICs) and Third-Party Administrators (TPAs) to validate the mapping completed by Healthcare Providers (HCPs) on an individual transaction basis as transactions will include the nphies standard code for each item as well as its previously used non-standard code. The application of Shadow Billing can apply to both the Authorization and Claim transactions.

The validation process of such mapping is expected to be a continuous process that will be Health Insurance Companies (HICs) and Third-Party Administrators (TPAs) driven, with feedback and adjustments to mapping being shared over time with Healthcare Providers (HCPs).

SECTION 2.0 PACKAGE MAPPING AND BILLING

2.1 Current Situation

Prior to implementation of nphies, health service Packages were agreed between Health Insurance Companies (HICs)/Third-Party Administrators (TPAs) and Healthcare Providers (HCPs) and used to refer to a *group* of services. Each package has an agreed contractual price.

Package codes are not standardized among Healthcare Providers (HCPs) and include different services performed under the umbrella of the package.

In the context of nphies, the individual services within a package are referred to as *items*.

2.2 Mapping Solution

This section provides a summary of this document. The shadow billing is a methodology that will ultimately provide all market participants with visibility during the transition period from billing using non-standard to standardized coding, which both the non-standard and standard codes should be included within the nphies transactions.

Below is a summary on how to use shadow billing in Pre-Authorization and Claims packages.

2.3 Package Billing

To bill packaged items, you will need to perform two main activities: Mapping then Billing.

Mapping:

1- Map non-standard package code to a nphies code, which will be used as **reference** to describe your package in nphies platform.
IF no nphies code can be used as description of your package
THEN map it to Unlisted Code (E.g., 99999-99-99 Unlisted Procedure Code)
2- Map individual items within the package to nphies codes, and if they do not match any of nphies codes use suitable unlisted nphies codes from the codes listed in section 4.5.

Billing:

1- Flag your transactions that contain a package. Technical details on flagging can be found in section 2.5.
2- Enter your mapped reference code, with package amount.
3- Enter the individual items of the package one-by-one using nphies codes or unlisted codes, with Zero amounts.

2.3.1 Package Billing Examples:

Example of Package billing:

- **Package code**: Append332 (we refer to it as reference code)
- **Package description:** In-Patient (IP) Appendicectomy package.
- **Package price**: 2,400 SAR

- **Package Items**:

Service code/Non Standard Item Code	Item Name	nphies Code list name	nphies Standard Code	nphies Standard Service Name	Price
442	Lab Blood group	Saudi Billing System (SBS)	73250-00-80	BLOOD GROUP	0
889	Anesthesia	Saudi Billing System (SBS)	83670-00-60	Anesthesia Services Per Unit	0
776	Procedure fees	Saudi Billing System (SBS)	30571-00-00	Appendicectomy	0
554	X-Ray	Saudi Billing System (SBS)	58900-00-90	Radiography of abdomen	0
552	Drug	SFDA_GTIN / SFDA Registration No	06285097000049	AUGMENTIN 1.2GM VIAL	0
500	Consumables	SFDA (GMDN)	47203	Wound-nonadherent dressing, permeable, antimicrobial	0
011	Room and Board	Saudi Billing System (SBS)	83610-01-00	Room and Board: Per Diem - First Class Room	0

2.4 Detailed Shadow Billing Guidelines for Packages

The non-standard service code for a package code must be mapped to an existing code from nphies standard code lists. This code may not be exactly corresponding to the package but will be used as reference to report the package in nphies platform and can be any code from one of the nphies code sets.

For reporting the individual items within a package Healthcare Providers (HCPs) must map each non-standard service code to the corresponding nphies standard code.

Transactions that contain a package must be flagged by Healthcare Providers (HCPs). Details of this flag can be found in section 2.5.

2.4.1 In-Patient (IP) Appendectomy Package

Provider A has an In-Patient (IP) Appendectomy package with internal code Append332, with contracted price 2,400 SAR. Provider A has chosen to map this package to the corresponding SBS Procedure code for IP Appendicectomy Appendectomy - 30571-00-00.

- **Package code**: Append332
- **Package price**: 2,400 SAR
- **Package description:** In-Patient (IP) Appendicectomy package.

- **Package Items**:

Service code/Non-Standard Item Code	Item Name
442	Lab Blood group
889	Anesthesia
776	Procedure fees
554	X-Ray
552	Drug
500	Consumables
011	Room and Board

Provider A has also mapped the individual package non-standard item codes to the corresponding code from the nphies standard code lists.

Service code/Non Standard Item Code	Item Name	nphies Code list name	nphies Standard Code	nphies Standard Service Name
442	Lab Blood group	Saudi Billing System (SBS)	73250-00-80	BLOOD GROUP
889	Anesthesia	Saudi Billing System (SBS)	83670-00-60	Anesthesia Services Per Unit
776	Procedure fees	Saudi Billing System (SBS)	30571-00-00	Appendicectomy
554	X-Ray	Saudi Billing System (SBS)	58900-00-90	Radiography of abdomen
552	Drug	SFDA_GTIN / SFDA Registration No	06285097000049	AUGMENTIN 1.2GM VIAL
500	Consumables	SFDA (GMDN)	47203	Wound-nonadherent dressing, permeable, antimicrobial
011	Room and Board	Saudi Billing System (SBS)	83610-01-00	Room and Board: Per Diem - First Class Room

2.5 Reporting in nphies

The reporting scenario described below can apply to both the Authorization and Claim transactions.

a. Claim.item.extension.package field:

This field should be added in the transaction and set to **true** to enable shadow billing for this package.

b. Claim.item.productOrService field:

This field will contain both package codes:

- nphies mapped code: (30571-00-00) - This code should correspond to one nphies standard code or unlisted codes (listed in section 4.5) and nphies Business and Validation Rules (BRVRs) will apply to this field. In this example the corresponding code is from nphies standard codes (e.g., Saudi Billing System).

- HCP non-standard package code: (Append332) - nphies Business and Validation Rules (BRVRs) will not be applied on the non-standard package code.

- Package net price is to be reported in this field as contractually agreed.

c. Claim.item.detail.productOrService fields:

These fields will contain the list of item package codes as per the nphies standard code or unlisted codes (listed in section 4.5).

- Healthcare Providers (HCPs) must only include items which were rendered and not report, by default, all items within the package.
- Items.detail or package item will have zero amount as price (item.detail.net = 0).

2.6 Additional Package Shadow Billing Examples

2.6.1 In-Patient (IP) Caesarean Section package and Salpingotomy

Provider A has an In-Patient (IP) Caesarean Section package with internal code Caesarean001, with contracted price 10,000 SAR. Provider A has chosen to map this package to the corresponding SBS Procedure code for IP Elective Caesarean Section - Elective classical caesarean section - 16520-00-00.
During the same admission, additional procedure was done on Fallopian Tubes as Salpingotomy. Provider A has chosen to map this code to the corresponding SBS Procedure Code - Salpingotomy - 35713-12-00, which is not part of the package and is to be billed separately.

- **Package code**: Caesarean001
- **Package price**: 10,000 SAR
- **Package description:** In-Patient (IP) Caesarean Section package.
- **Package Items**:

Service code/Non-Standard Item Codes included in the package - Caesarean001	Item Name
442	Lab Blood group
889	Anesthesia
776	Procedure fees - Elective Caesarean Section package
552	Drug
500	Consumables
011	Room and Board

- **Additional Item code**: 770
- **Additional Item Price**: 1,000 SAR

Service code/Non-Standard Item Codes for additional procedure - Salpingotomy	Item Name
770	Salpingotomy

Provider A has mapped the individual package non-standard item codes to the corresponding code from the nphies standard code lists as well as additional procedure code to corresponding nphies code

Service code/Non Standard Item Code	Item Name	nphies Code list name	nphies Standard Code	nphies Standard Service Name
442	Lab Blood group	Saudi Billing System (SBS)	73250-00-80	BLOOD GROUP
889	Anesthesia	Saudi Billing System (SBS)	83670-00-60	Anesthesia Services Per Unit
776	Procedure fees - Elective Caesarean Section package	Saudi Billing System (SBS)	16520-00-00	Elective classical caesarean section
552	Drug	SFDA_GTIN / SFDA Registration No)	06285097000049	AUGMENTIN 1.2GM VIAL
500	Consumables	SFDA (GMDN)	47203	Wound-nonadherent dressing, permeable, antimicrobial
011	Room and Board	Saudi Billing System (SBS)	83610-01-00	Room and Board: Per Diem - First Class Room
770	Salpingotomy	Saudi Billing System (SBS)	35713-12-00	Salpingotomy

2.6.2 In-Patient (IP) Partial lobectomy of brain package and Electroencephalography

Provider A has an In-Patient (IP) Partial lobectomy of brain package with internal code Brain001, with contracted price 20,000 SAR. Provider A has chosen to map this package to the corresponding SBS Procedure code for IP Elective Partial lobectomy of brain - Elective Partial lobectomy of brain - 40703-02-00
During the same admission, additional procedure was done as Electroencephalography. Provider A has chosen to map this code to the corresponding SBS Procedure Code - Electroencephalography 11000-00-00, which is not part of the package and is to be billed separately.

- **Package code**: Brain001
- **Package price**: 20,000 SAR
- **Package description:** In-Patient (IP) Partial lobectomy of brain package.
- **Package Items**:

Service code/Non-Standard Item Codes included in the package - Brain001	Item Name
442	Lab Blood group
889	Anesthesia
650	Procedure fees - Partial lobectomy of brain package
552	Drug
330	Tomography of brain
500	Consumables
011	Room and Board

- **Additional Item code**: 335
- **Additional Item Price**: 1,000 SAR

Service code/Non-Standard Item Codes for additional procedure - Electroencephalography	Item Name
335	Electroencephalography

Provider A has also mapped the individual package non-standard item codes to the corresponding code from the nphies standard code lists as well as additional procedure code to corresponding nphies code

Service code/Non Standard Item Code	Item Name	nphies Code list name	nphies Standard Code	nphies Standard Service Name
442	Lab Blood group	Saudi Billing System (SBS)	73250-00-80	BLOOD GROUP
889	Anesthesia	Saudi Billing System (SBS)	83670-00-60	Anesthesia Services Per Unit
650	Procedure fees - Partial lobectomy of brain package	Saudi Billing System (SBS)	40703-02-00	Elective Partial lobectomy of brain
330	Tomography of brain	Saudi Billing System (SBS)	56001-00-00	Computerised tomography of brain
552	Drug	SFDA_GTIN / SFDA Registration No)	06285097000049	AUGMENTIN 1.2GM VIAL
500	Consumables	SFDA (GMDN)	47203	Wound-nonadherent dressing, permeable, antimicrobial
011	Room and Board	Saudi Billing System (SBS)	83610-01-00	Room and Board: Per Diem - First Class Room
335	Electroencephalography	Saudi Billing System (SBS)	11000-00-00	Electroencephalography

2.6.3 Out-Patient (OP) Root Canal Treatment (3 Roots) with Filling

Provider A has a Dental Procedure ROOT CANAL TREATMENT (3 CANALS) WITH FILLING with internal code DEN001, with contracted price 2000 SAR. Provider A has chosen to map this code to the corresponding SBS Procedure code for Root Canal - Complete chemo-mechanical preparation of root canal one canal- 415

- **Package code**: DEN001
- **Package price**: 2,000 SAR
- **Package description:** ROOT CANAL TREATMENT (3 CANALS) WITH FILLING.
- **Package Items**:

Service code/Non-Standard Item Codes included in the package – DEN001	Item Name
001	Root Canal Treatment 1 Canal
002	Root Canal Treatment Additional Canal
002	Root Canal Treatment Additional Canal
003	Filling after Root Canal Treatment

Provider A has also mapped the individual package non-standard item codes to the corresponding code from the nphies standard code lists

Service code/Non Standard Item Code	Item Name	nphies Code list name	nphies Standard Code	nphies Standard Service Name
001	Root Canal Treatment 1 Canal	ADA Codes	415*1	Complete chemo-mechanical preparation of root canal one canal
002	Root Canal Treatment Additional Canal	ADA Codes	416*2	Complete chemo-mechanical preparation of root canal each additional canal
003	Filling after Root Canal Treatment	ADA Codes	533*1	Adhesive restoration three surfaces posterior tooth direct

SECTION 3.0 FEE-FOR-SERVICE NON-STANDARD CODES MAPPING AND BILLING

3.1 Current Situation

Prior to implementation of nphies, non-standardized service codes were agreed between Health Insurance Companies (HICs)/Third Party Administrators (TPAs) and Healthcare Providers (HCPs) with a contractually agreed price.

With the application of nphies standard codes and unification of service codes across the KSA market, Healthcare Providers (HCPs) are required to map their existing contracted services to the corresponding nphies standard codes.

3.2 Mapping Solution

This guideline is provided to facilitate the transition from non-standard to standard billing codes for Health Insurance Companies (HICs)/Third Party Administrators (TPAs) and Healthcare Providers (HCPs).

For a Healthcare Provider (HCP) billing using the fee-for-service model and billing for each individual item, each item code should be mapped to the corresponding code from the nphies standard code lists.

Both the non-standard and standard codes should be included within the nphies transactions.

3.3 Item Billing

To bill an item, you will need to perform two main activities: Mapping then Billing.

Mapping:
Look for a nphies code that matches the description of your non-standard service code:
IF no code matches the same description
THEN map it to a similar code
IF no similar code exists in nphies codes
THEN map it to Unlisted Code of the same category (listed in section 4.5).

Billing:

1- Flag your transactions that contain an item. Technical details on flagging can be found in section 3.4.
2- Enter both the non-standard and standard codes of the item within the transactions.
3- Enter the item amount.

3.3.1 Item Billing Examples:

Service code/Non Standard Item Code	Item Name	nphies Code list name	nphies Standard Code	nphies Standard Service Name	Price
442	Lab Blood group	Saudi Billing System (SBS)	73250-00-80	BLOOD GROUP	200
889	Anesthesia	Saudi Billing System (SBS)	83670-00-60	Anesthesia Services Per Unit	400
776	Procedure fees	Saudi Billing System (SBS)	30571-00-00	Appendicectomy	1200

554	X-Ray	Saudi Billing System (SBS)	58900-00-90	Radiography of abdomen	200
552	Drug	SFDA (GTIN)	06285097000049	AUGMENTIN 1.2GM VIAL	100
500	Consumables	SFDA_GMDN / SFDA Registration No)	47203	Wound-nonadherent dressing, permeable, antimicrobial	100
011	Room and Board	Saudi Billing System (SBS)	83610-01-00	Room and Board: Per Diem - First Class Room	1000

3.4 Reporting in nphies

The same scenario described below can apply to both the Authorization and Claim transactions.

a. Claim.item.extension.package field:

   This field should be added in the transaction and set to **false** to identify that this item is not part of a package.

b. Claim.item.productOrService field

   This field will contain:

   - nphies mapped code: (73250-00-80) - This code should correspond to one nphies standard code or unlisted codes (listed in section 4.5) and nphies Business and Validation Rules (BRVRs) will apply to this field. In this example the corresponding code is from the nphies standard code (e.g., Saudi Billing System (SBS)).
   - Provider internal lab blood group code: (442) - nphies Business and Validation Rules (BRVRs) will not be applied on the non-standard code
   - Item net price is to be reported in this field as contractually agreed.

SECTION 4.0 APPLICATION OF SHADOW BILLING

The application of shadow billing supports the shift from non-standardized coding to standardized coding, while allowing for validation.

4.1 Many to One Mapping of Services

As with any implementation of a unified billing system in a given market, the adoption of standardized code sets may require customization of some item codes. Some Healthcare Providers (HCPs) may encounter difficulties in mapping for some items where a “one to one” mapping cannot be found.

When encountered with “many to one” mapping scenarios, shadow billing serves to maintain an adequate level of granularity by allowing the previously used non-standard code to be included in the nphies transaction, thereby maintaining the same level of communication until a permanent coding solution can be applied.

The fee-for-service reporting laid out in section 3.3 is to be implemented for mapping an item with a non-standardized code that **cannot** be mapped to a corresponding code from the *nphies Clinical Standard code* lists with the same description. It is recommended that these items be mapped to a **similar** code and description from the *nphies Clinical Standard code* lists. The inclusion of the non-standard code within the transaction will maintain the granularity level and detail

4.2 GMDN – Medical Devices and Consumables

The fee-for-service reporting laid out in section 3.3 is to be implemented for mapping an item with a non-standardized code that **cannot** be mapped to a corresponding *GMDN – Medical Devices and Consumables* code with the same description. In this scenario, the Healthcare Provider (HCP) must map such items to the *SFDA-GMDN code* - **99999 - Unlisted Item**.

4.3 GTIN – Medication

The fee-for-service reporting laid out in section 3.3 is to be implemented for billing of any imported medications and medications with an SFDA Registration ID that **does not** have a corresponding *GTIN - Medication* code. In this scenario, the Healthcare Provider (HCP) must map such items to the suitable SFDA-GTIN code from the codes listed in section 4.5.

The exception to this is for ***Herbals / Vitamins*** where SFDA Registration ID can be used if available. Eventually once Herbals and Vitamins will have GTIN codes, it will be required to use GTIN codes for herbals and vitamins too).

4.4 Outpatient: ADA-Australian Dental Association

The fee-for-service reporting laid out in section 3.3 is to be implemented for mapping an item with a non-standardized code that cannot be mapped to a corresponding *ADA-Australian Dental Association code* with the same description. It is recommended that these items be mapped to a **similar** *ADA-Australian Dental Association code* and description. The inclusion of the non-standard code within the transaction will maintain the granularity level and detail.

A Healthcare Provider (HCP) may find that there are items that **cannot** be mapped to a **similar** *ADA-Australian Dental Association code* and description. In this scenario, the Healthcare Provider (HCP) must map such items to the *ADA-Australian Dental Association code* – **9999 - Unlisted Out-Patient Dental Code**. The inclusion of the non-standard code within the transaction will maintain the granularity level and detail.

4.5 Unlisted Item Codes

The Table below displays the *Unlisted Item codes* that currently exist within the *nphies Clinical Standards Code Lists* and are recommended for use only for an item with a non-standardized code that **cannot** be mapped to a corresponding code from the *nphies Clinical Standard code* lists with the **same** or **similar** description.

nphies Code	Long Description	Type
83500-00-80	Unlisted ambulance service	Transportation (SBS)
83700-00-00	Unlisted services yet to be defined	KSA service codes (SBS)
99999-99-99	Unlisted procedure code	Procedures (SBS)
99999-99-91	Unlisted dental procedure code	Dental (SBS)
99999-99-92	Unlisted imaging code	Imaging (SBS)
73050-39-70	Unlisted chemistry tests	Laboratory (SBS)
73100-09-80	Unlisted hematology and coagulation procedure	Laboratory (SBS)
73150-01-20	Unlisted urinalysis	Laboratory (SBS)
73200-03-60	Unlisted cytopathology procedure	Laboratory (SBS)
73200-10-60	Unlisted surgical pathology procedure	Laboratory (SBS)
73250-03-80	Unlisted transfusion medicine procedure	Laboratory (SBS)
73350-06-00	Unlisted molecular pathology procedure	Laboratory (SBS)
73400-00-40	Unlisted in vivo laboratory services	Laboratory (SBS)
73400-05-10	Unlisted reproductive medicine laboratory procedure	Laboratory (SBS)
99999999999991	Unlisted nutritional supplements (Other nutritional substitute)	SFDA_GTIN
99999999999992	Unlisted nutritional supplements (Enteral feeds)	SFDA_GTIN
99999999999993	Unlisted other non-medications	SFDA_GTIN
99999999999994	Unlisted nutritional supplements (Mother's milk substitute (baby/infant formula)	SFDA_GTIN
99999999999995	Unlisted cosmetic	SFDA_GTIN
99999999999996	Unlisted herbal and vitamins	SFDA_GTIN
99999999999997	Unlisted OTC	SFDA_GTIN
99999999999998	Unlisted chemotherapy	SFDA_GTIN
99999999999999	Unlisted other medications	SFDA_GTIN
99999	Unlisted medical devices	SFDA_GMDN
9999	Unlisted Out-Patient Dental Code	Oral Health Out-patient (ADA)
